

April 7th, 2022

Dear Valued Customer,

We continue to work with our 3rd party manufacturer of INFUVITE to improve supply. As a result, based on current and projected inventory, we are now in a position where we can raise the allocation of Adult INFUVITE Single-dose Multivitamin Injections (2A9018) to 100%, effective immediately. There is no change to the allocation level for Pediatric INFUVITE Single-dose Multivitamin Injections (2A9008) at this time.

We continue to work diligently with all parties involved to return to a normalized situation as soon as possible. Please see the table below for updated allocation limits.
