

October 25, 2022

Dear Valued Customer,

Earlier this year, raw material shortages resulted in the restrictive allocation of ExactaMix valve sets. As we continue to mitigate these supply challenges, we are pleased to announce that effective the date of this letter, allocations on ExactaMix valve set components will be raised to 100%. We expect that this shortage situation will continue to improve over the coming months.

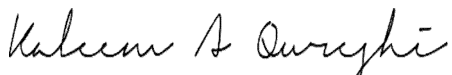

CODE	DESCRIPTION	ALLOCATION
H938792	Sterile EXACTAMIX 1200 Valve Set	100%
H938724	Sterile EXACTAMIX 2400 Valve Set	100%

This allocation level is based on historical ordering from July 2021 through December 2021.

It is important to note that the medical device correction set forth in FA-2022-024 – ExactaMix Valve Set Port Leakage, continues to apply to ExactaMix 2400 valve sets (lot 60316024 and higher).

We understand the importance of supply continuity and the impact this has on your ability to care for your patients, and therefore are committed to transparently and proactively communicating any changes in supply with you. To ensure you have the information you need to plan patient care, please visit the [Supply Resources](https://ushospitalproducts.baxter.com/baxter-supply-resources) page on our website (<https://ushospitalproducts.baxter.com/baxter-supply-resources>) and download our Supply Availability Report to access the latest information on product supply.

Sincerely,
