

June 8, 2023

Dear Valued Customer,

Baxter is revising its current allocation of Intralipid 20% (Intravenous Fat Emulsion) as set forth below. However, we expect our supply of Intralipid to permanently stock out in the coming months, with select codes already in limited supply. At that point, Baxter's distribution of Intralipid will come to an end.

Intralipid product codes and their allocation are listed below.

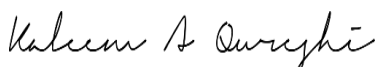

Product Description	Product Code	National Drug Code	Allocation
INTRALIPID, 20% IV Fat Emulsion, 100 mL	2B6061	0338-0519-58	100%
INTRALIPID, 20% IV Fat Emulsion, 250 mL	2B6062	0338-0519-09	100%
INTRALIPID, 20% IV Fat Emulsion, 500 mL	2B6063	0338-0519-13	100%
INTRALIPID, 20% IV Fat Emulsion, 1000 mL	2B6064	0338-0519-14	Out of Stock*
INTRALIPID, 30% IV Fat Emulsion, 500 mL	2B6065	0338-0520-13	Available. No Allocation

*Remaining backorders will be cancelled; please contact your Baxter Sales Representative for alternatives.

We recognize that this change may impact how you utilize parenteral nutrition. Baxter manufactures and distributes Clinolipid 20% (Lipid Injectable Emulsion), an olive-oil based lipid emulsion which is available in the presentations listed below. To evaluate the use of Clinolipid in your institution, please contact your Baxter Nutrition Specialist, or call the Center for Service at 1-888-229-0001. You can learn more about Clinolipid [here](#).

Product Description	Product Code	National Drug Code
