

March 25, 2020

Dear Valued Customer,

Last week, we shared our approach to responding to COVID-19 based on the status of the pandemic at the time. As you have likely experienced in your personal life, across your teams and among the patients you serve, COVID-19 continues to challenge communities across the globe.

Our commitment on behalf of Baxter is to continue educating and protecting employees, assisting healthcare providers and maintaining business continuity.

Since the beginning stages of the pandemic, we have continued to increase production across our portfolio and optimize our supply chain network. Measures taken include working with third-party suppliers, expanding shipping options to ensure healthcare needs are being met and producing at maximum capacity across our manufacturing plants.

While we have taken every proactive measure possible to increase supply, we are continuing to see unprecedented demand across our portfolio of products. Due to this significant surge, we believe now is the appropriate time to place a protective allocation across a significant portion of our portfolio. We are taking this action to help ensure equitable, continuous supply for our customers for the critical, life-saving and sustaining products your patients depend on. We believe it is our obligation to take this action now to minimize the potential of long-term stockouts and backorders during this challenging time.

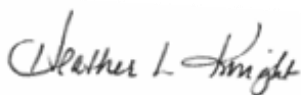

For you, this means:

- Beginning immediately, you will see protective allocations ranging from 100 to 120 percent across the following categories: Large Volume Parenteral (LVP) and Small Volume Parenteral (SVP) I.V. solutions, MINI-BAG Plus container systems, I.V. premixes (including liquid and frozen), nutrition, inhaled gases, Continuous Renal Replacement Therapy (CRRT) consumables, and I.V. administration and extension sets.
- The allocations have been determined based on your historical purchases over the last several months.
- We continue to optimize production and expand manufacturing capacity. We will communicate immediately if there are any modifications to our inventory status.
- A full list of product codes and allocation levels accompanies this letter.

We are committed to transparent communication and will continue to remain in close contact as the situation develops. Our entire organization is dedicated to doing all that we can to help meet your needs during this influx of critical cases. As always, please contact your local Baxter representative to discuss your specific situation.

We know you count on Baxter to deliver the life-saving and life-sustaining products your patients rely on, and we are working around the clock to ensure we are a responsible, reliable partner to all our customers and the patients they serve. Thank you for your continued partnership and trust during this time of need.

Sincerely,

Heather L. Knight
General Manager
U.S. Hospital Products

Gavin Campbell
General Manager
U.S. Renal

The following is a summary of the protective allocation percentages being put in place across Baxter's U.S. Hospital Product categories. Please refer to the full list below for further detail:

Product Category Type	Allocation %
Small Volume Parenterals (SVP), Mini-Bag Plus container systems, Pour Bottles, IV administration and extension sets, needleless connectors, inhaled gases	100%
Large Volume Parenterals (LVP) and Continuous Renal Replacement Therapy (CRRT) Consumables	110%
IV premixes (Frozen & Liquid)	100% - 125%
Clinical Nutrition Solutions & Compounding and Oral Syringes	120%
